Norstar Integrated Communication Systems

Simple-to-use telephone systems with practical, scalable features that do not requrie complicated end-user training.

Cost-effective systems that fit your budget today, with the capacity and scalable applications to secure your competitive edge as you grow.

Modular, scalable design lets you choose the system that fits your needs today, while planning for the future.

It supports all Norstar and Business Series telephones, including fully-featured digital functions with LCD and soft keys. Easily add Norstar applications, such as voice mail, automated attendant, computer telephony integration (CTI), and automatic call distribution (ACD).
